# SQL File

Text file to provide how to run the program and other details

Instructions to run the program.

1. Make sure all the files are downloaded and using the flask the SQL is connected to the app.py file

2. make sure the file directory is the correct order i.e.

3. Make sure the port to run the app.py file is open.

For the demo video we I have used the following username and password

For admin

Username: [admin@admin.com](mailto:admin@admin.com)

Password: Admin1

For customer

Username: [test@test.com](mailto:test@test.com)

Password: 12345
